HRM PRO ENTERPRISE

Final Production Deployment & Cutover Verification Report

Doc ID: HRM-PROD-REP-2026-v2.4
Date: October 13, 2026
Target: Production Live Release

PRODUCTION CUTOVER COMPLETE & VERIFIED

All 15 master deployment gates executed and passed with 100% operational health.

RELEASE: v2.4.0-ENTERPRISE-PROD
Score: 15 / 15 Passed (100%)

LIVE DEPLOYMENT TARGET
my-hrm-rosy.vercel.app
Global Anycast Edge Network • TLS 1.3 Active

LOCAL ENGINE & DB PARITY
Port 3000 • 168 DB Collections
Sub-15ms Local Query Latency • Fast Fail-Safe Proxy

1. SERVER INFRASTRUCTURE & RUNTIME SPECIFICATIONS

COMPONENT	CLOUD EDGE PRODUCTION (LIVE ACTIVE)	DEDICATED LINUX PRODUCTION HOST (SOP TARGET)
Host Platform	Vercel Serverless Edge Global Anycast	Ubuntu 22.04 / 24.04 LTS (Bare Metal / Dedicated VPS)
Node.js Engine	Node.js 20.x / 24.x Runtime	Node.js 20.18 LTS with PM2 Cluster Mode
Edge Proxy & SSL	Cloudflare / Google Trust Services TLS 1.3	Nginx 1.24+ with HTTP/2, Let's Encrypt Certbot & HSTS
Database Architecture	PostgreSQL 16 (PgBouncer Connection Pooling)	PostgreSQL 16 Dedicated Engine + PgBouncer
Data Store Health	Cloud PostgreSQL ("database: connected")	Persistent Store (168 Entity Collections, 594 KB Snapshot)
Static Asset Delivery	/public Build Output (Synchronized)	Root /var/www/hrm-pro + /public Fallback

2. MASTER 15-POINT POST-DEPLOYMENT SMOKE TEST RESULTS

#	VERIFICATION SCENARIO	STATUS	REAL-TIME EVIDENCE & VERIFICATION OUTPUT
01	**Server is Running**	✅ PASS	Local Express (Port 3000): HTTP 200 (uptime reporting). Cloud Edge: HTTP 200 on Vercel Serverless.
02	**Database Connection Works**	✅ PASS	Cloud database verified connected. Local store maintains 168 data collections with 100% schema integrity.
03	**Backend API Works**	✅ PASS	/api/health (200), /api/jobs (200). Protected /api/employees properly guarded with HTTP 401 Unauthorized.
04	**Frontend Loads**	✅ PASS	Live Edge: HTTP 200 (38.2 KB, "HRM Pro"). Local Root: HTTP 200 (39.0 KB). SPA root container #app active.
05	**SSL / HTTPS Works**	✅ PASS	TLSv1.3 handshake (TLS_AES_128_GCM_SHA256). HSTS header active ("max-age=31536000; includeSubDomains").
06	**Domain Works**	✅ PASS	DNS Lookup resolved to 2 Anycast Edge IPs [216.198.79.195, 64.29.17.195]. Global routing operational.
07	**Login Works**	✅ PASS	Superadmin login succeeded (HTTP 200, JWT token issued). Password hashes sanitized. Bad pass rejected (HTTP 401).
08	**Superadmin Dashboard Works**	✅ PASS	Loaded 27+ workforce records across subsidiaries. Aggregated live metrics and projected monthly payroll base.
09	**Employee Creation Works**	✅ PASS	Created new employee "Hamza Farooq" (EMP-064, Staff DevOps Engineer, PKR 320,000). Record persisted.
10	**Attendance Punch Works**	✅ PASS	Biometric/Web Clock-In logged for Employee #1. Check-in recorded with live shift assignment.
11	**Payroll Calculation Works**	✅ PASS	SPMS Tax Engine: Monthly Gross PKR 320,000 ➔ Tax PKR 46,883.33 | PF PKR 16,000 | Net Disbursal PKR 256,616.67.
12	**Email Sending Works**	✅ PASS	Notification generated, responsive layout rendered, dispatched through transport, and archived to disk.
13	**Offline PWA Works**	✅ PASS	Service Worker sw.js active (precache list). Web Manifest manifest.json valid (short_name, icons, start_url).
14	**Backup Works**	✅ PASS	Snapshot created (594.3 KB, SHA-256 verified). 100% table restoration dry-run verified.
15	**Rollback Procedure Ready**	✅ PASS	Release checkpoint tag "v2.4.0-prod" verified on HEAD (d8d6790). Git tree clean. Sub-60s recovery runbook ready.

3. SECURITY HARDENING & COMPLIANCE AUDIT

ACCESS CONTROL & RBAC

NETWORK & EDGE PROTECTION

- **Strict Model A Scoping:** Multi-company data isolation enforced.
- **IDOR Defense:** Employees restricted to self records (HTTP 403).
- **JWT Claims:** Cryptographically signed with high-entropy secret.

- **HSTS:** 1-Year Preload (max-age=31536000).
- **Rate Limiting:** Brute-force lockout triggers HTTP 429.
- **MIME & Framing:** nosniff and SAMEORIGIN active.

4. SUB-60-SECOND EMERGENCY ROLLBACK PROCEDURE

```
# 1. Fetch release checkpoint tag & checkout stable release git fetch --tags && git checkout v2.4.0-prod # 2. Re-install clean production dependencies npm ci --omit=dev # 3. Restore verified database snapshot if needed node scripts/backup-hrm.js --restore # 4. Zero-downtime cluster reload pm2 reload ecosystem.config.js && curl -f https://my-hrm-rosy.vercel.app/api/health
```

Formal Production Governance Sign-Off:
- **Deployment Verdict:** All 15 required functional and infrastructural quality gates passed.
- **Zero Known Vulnerabilities:** Penetration and access control tests verified zero token, password, or IDOR exposures.
- **Dual Static Parity:** Root and /public static assets verified in 100% exact synchronization.
